Severe Impacts

# **WEATHER KEY POINTS**

**04/24/22 - 04/30/22**

## **Sunday - Saturday**

- Temperatures will see a considerable warming trend across the state through the weekend and first half of the week, with some minor heat impacts likely to develop across southern California as temperatures warm well into the 90s.
  - Some record high temperatures are possible, particularly on Monday which will be the hottest day.
- Locally gusty offshore winds will occur in the southern California mountains and deserts through Monday.
  - These winds may bring some localized elevated fire weather conditions, though widespread fire concerns are not expected.
  - Santa Ana winds will slowly diminish Sunday afternoon.
  - Gusty Sundowners look to redevelop Tuesday night into Wednesday.
- Dry weather is also expected for the majority of the state through the week, except for some light rain showers over far northern California late Monday through Thursday.

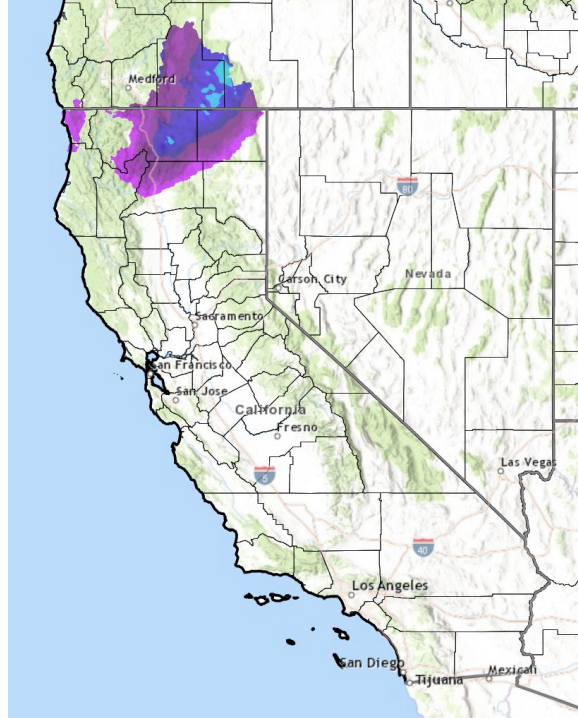

# PRECIPITATION FORECAST

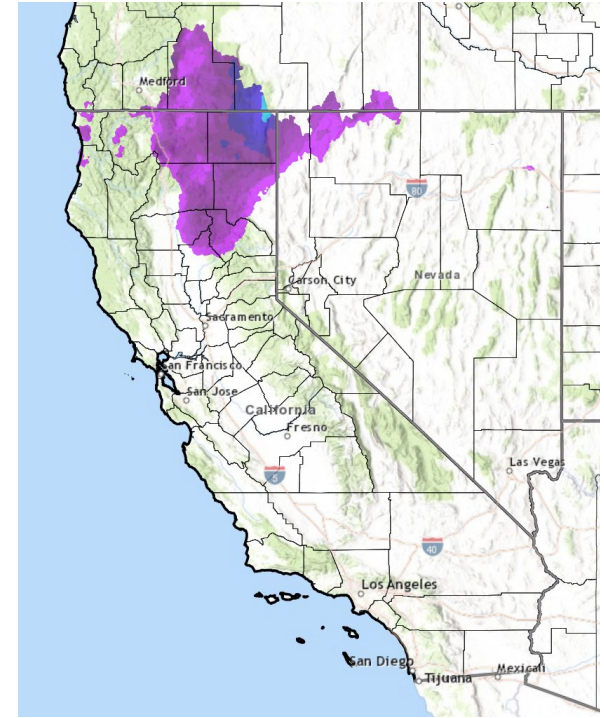

04/24/22 - 04/26/22

Sunday

Monday

Tuesday

**Note:** Forecast precipitation amounts are an average for any particular location. Thunderstorms may produce locally higher rainfall amounts.

Precipitation (inches)

# **WEATHER OUTLOOK**

**04/29/22 - 05/07/22**

## **6-10 Day Outlook (April 29 - May 3)**

### **Temperatures**

- Below normal temperatures are favored statewide

### **Precipitation**

- Near normal precipitation is also favored for the northern half of the state, with below normal precipitation slightly favored for the southern half

## **8-14 Day Outlook (May 1 – May 7)**

### **Temperatures**

- Below normal temperatures are slightly favored for most of the state, except far southern California where near normal temperatures are favored

### **Precipitation**

- Above normal precipitation is slightly favored for far northern California, with near normal precipitation favored over the remainder of the state
